QUESTION BANK FOR PEN PAPER TEST-1
CLASS – VIII (2024-25)
SUBJECT -ENGLISH

SECTION – A (READING)

1. Read the following passage and Answer the following questions: -

If a country should have a message for its people, it should be a message of human dignity. The ideals of a nation should be freedom of thought, speech, press, right of assembly and right of worship. A country should boldly declare to a world dominated by tyrants that “all men are created equal and endowed by their Creator with certain unalienable rights” and “among them life, liberty and the pursuit of happiness”. It should be the source of strength and power for a nation. If people have the freedom to live their lives with dignity, they can function with a sound mind and physical health.

A country’s moral, political and economic status lies in the strength of its people. A nation should strive to become a more perfect, perfect country where people are given a commitment and hope in their hearts to work and cherish freedom, justice and opportunity. We don’t always get what we want when we want it, but it’s always good to believe that someday, somehow, we will get what we want.

Based on your reading of the above passage, answer the questions given below

- i. What message should a country have for its people?
- ii. What are the ideals of a nation, according to the passage?
- iii. What should a country declare to a world dominated by tyrants?
- iv. Where should a country’s strength and power come from?
- v. What lies in a country’s moral, political, and economic status, according to the passage?

2. Read the passage given below carefully and Answer the questions that follows:-

Like watering a tree, we grow our friendships (and all our relationships) by nurturing them. Friendships need the same attention as any other relationship if they are to continue. These relationships can be delightfully non-judgmental, supportive, understanding and fun.

Sometimes a friendship can bring out positive aspects that you would never see in any other relationship. This may be because the pressure to play the ‘role’ (daughter, partner or child) is removed. With a friend, you will be free to be yourself and change. Of course, you are free to do this in all other relationships as well, but in friendships: you will have a lot of rehearsal and discussion about the changes they experience.

It’s an unconditional experience where you get as much as you give. You can openly explain yourself to a friend without fear of offending a family member. How does friendship grow? The answer is simple. expresses itself; By carefully remembering what shows the most empathy, and seeing the world through your friend’s eyes, you will understand the value of friendship. It means learning to accept a person from a completely different family to your own or perhaps someone from a completely different cultural background. This is how we learn tolerance. Instead, we gain tolerance and acceptance for our own differences.

Based on your reading of the above passage, answer the questions given below

- i. What is the importance of nurturing friendships?
- ii. What makes friendships delightfully non-judgmental?
- iii. How can friendships help in accepting people from different cultural backgrounds?
- iv. What does it mean to express oneself in a friendship?
- v. What is the role of empathy in growing friendships?

SUBJECT: MATHEMATICS

1. Find the difference $\frac{-8}{9} - \frac{2}{5}$
2. Verify the commutative property under subtraction if $\frac{P}{Q} = \frac{5}{12}$ and $\frac{R}{S} = \frac{-7}{8}$
3. Simplify: (i) $-3\frac{1}{6} - \frac{2}{15} + 4\frac{1}{6} + \frac{3}{5}$ (ii) $\frac{-7}{2} + \frac{4}{5} - \frac{-11}{2} + \frac{3}{5}$
4. Verify the property $a \times (b + c) = a \times b + a \times c$.
(i) $a = \frac{-15}{4}$, $b = \frac{3}{7}$, $c = \frac{-12}{5}$ (ii) $a = \frac{5}{4}$, $b = \frac{6}{7}$, $c = \frac{-11}{15}$
5. Verify associative property under addition.
(i) $p = \frac{7}{4}$, $q = \frac{-3}{7}$, $r = \frac{-7}{5}$ (ii) $p = \frac{-9}{5}$, $q = \frac{6}{7}$, $r = \frac{4}{9}$
6. Simplify: (i) $(\frac{-3}{2} \times \frac{4}{5}) - (\frac{1}{2} \times \frac{3}{4}) + (\frac{9}{5} \times \frac{-10}{3})$ (ii) $(\frac{13}{2} \times \frac{4}{5}) - (\frac{16}{7} \times \frac{14}{5}) + (\frac{19}{8} \times \frac{32}{15})$
7. Verify commutative property under multiplication.
(i) $x = \frac{7}{3}$, $y = \frac{-3}{7}$, $z = \frac{4}{5}$ (ii) $x = \frac{-9}{7}$, $y = \frac{7}{11}$, $z = \frac{5}{9}$
8. Write the additive inverse of each of the following:
(i) $\frac{7}{18}$ (ii) $\frac{-5}{13}$ (iii) $\frac{-11}{16}$ (iv) $(\frac{-3}{10} + \frac{4}{5})$
9. Write the multiplicative inverse of each of the following:
(i) $\frac{-5}{11}$ (ii) $\frac{8}{13}$ (iii) $\frac{7}{16}$ (iv) $(\frac{-7}{11} - \frac{5}{22})$
10. The sum of two rational numbers is $\frac{-9}{11}$. If one of them is $\frac{3}{10}$, find the other number.
11. The product of two rational numbers is $\frac{27}{13}$. If one of them is $\frac{4}{5}$, find the other number.
12. The perimeter of an isosceles triangle is 18 cm. If one of the equal sides is $5\frac{3}{4}$ cm long, find the measure of the third side.

DIRECTIONS: In Question number 29, a statement of Assertion (A) is followed by a statement of Reason (R). Choose the correct option.

- a) Both (A) and (R) are true and (R) is the correct explanation of (A).
- b) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- c) (A) is true but (R) is false.
- d) (A) is false but (R) is true.

29. **Assertion** –Rational numbers are closed under division

Reason – A rational number is a number that is in the form of $\frac{p}{q}$, where p and q are integers, and q is not equal to 0.

30. A number which can be written in the form of $\frac{p}{q}$, where p and q are integers, and q is not equal to 0 is called a rational number. For any two rational numbers a and b, $a + b$, $a - b$, $a \times b$ are also rational numbers. For any two rational number a, $a \div 0$ is not defined. So rational numbers are not closed under division. Zero is called the identity for addition of rational numbers.

- (i) Write the additive inverse of $\frac{5}{6}$.
- (ii) Find multiplicative inverse of $(\frac{1}{2} + \frac{3}{4})$.

OR

If $a = \frac{-9}{5}$ and $b = \frac{13}{10}$, show that $a + b$ is a rational number.

(iii) Find the value of $(\frac{-9}{5} \times \frac{6}{7}) + (\frac{4}{9} \times \frac{-9}{5}) - \frac{1}{9}$.
